

Change of Head of Factory at Nordzucker's Uelzen site

New Head of Factory for Uelzen: Julian Kulenkampff takes over management of the Nordzucker factory in Uelzen. He succeeds Runi Egholm, who is moving to the Nykøbing site in Denmark.

Braunschweig, 3 March 2026 – Julian Kulenkampff took up his post as Head of Factory at the Nordzucker site in Uelzen on 1 March 2026. Runi Egholm, who has managed the factory for the past three years, is taking over as Head of Factory at the Nykøbing sugar plant in Denmark. Julian Kulenkampff was most recently Head of Production Excellence at the company's headquarters in Braunschweig and had been supporting the Nykøbing site as Operational Manager since November 2025.

Julian Kulenkampff joined the Nordstemmen site in 2010 as a production engineer. After holding various technical and strategic positions, he took on group-wide responsibility for Production Excellence in 2023. Following his short-term assignment in Nykøbing from November 2025, he is now succeeding Runi Egholm in Uelzen. "The close cooperation with Julian Kulenkampff over the past few months, but also his flexibility in spontaneously supporting the site in Nykøbing, Denmark, as Operational Manager in the middle of the campaign, have shown the dedication and involvement with which he approaches new tasks. I would like to thank him for his commitment to the Nordzucker Group to date and wish him a successful start at the Uelzen factory," explains Rudolf Bakker, Head of Operations at Nordzucker AG.

Torsten Bigalke, Managing Director Germany, adds: "Both Runi Egholm and Julian Kulenkampff have shown exceptional commitment and enthusiasm in their areas of responsibility over the past few years. I would like to thank Runi Egholm sincerely for his valuable contributions in Uelzen and am very pleased that we have been able to gain an experienced and highly qualified successor in Julian Kulenkampff, who will continue to lead the Uelzen plant successfully into the future."

Nordzucker

Nordzucker is one of the world's leading producers of sugar from sugar beet and sugar cane. The group produces sugar products in various forms, such as white sugar, raw sugar, refined sugar, organic sugar, specialities and liquid sugars. Nordzucker also produces animal feed, molasses, fertilisers and fuels, as well as electricity. In the 2024/25 financial year, the company generated sales of 2.8 billion euros.

With its revised Fields for Growth strategy, Nordzucker is focusing on two areas: firstly,

strengthening the profitability of its existing business by investing in sustainability and optimising its cost structure. Secondly, Nordzucker is aiming for further diversification as part of its planned growth outside the EU sugar market.

Nordzucker is committed to sustainability, from the farmer to the consumer, and is making sustainability an integral part of the company. In its processing and value chain, Nordzucker attaches great importance to regional cultivation, with short transport routes, the highest quality and social standards, and complete utilisation of crops. The goal is to make all production at its plants CO₂-neutral by 2050 at the latest.

High-quality products and services, growth prospects and continuous improvement are the driving force behind a dedicated and international team of around 4,100 employees at 19 European and Australian locations. www.nordzucker.com
